CLUE
Beech nuts are as big as marbles and covered in a spiky shell.

BEECH
BIRCH

CLUE
Beech have smooth gray bark — like an elephant!

CLUE
Birch leaves are small with saw tooth edges.

CLUE
Black scars show where branches have fallen off.

CLUE
Beech leaves are leathery and have lines on them that look like fish bones.

CLUE
Paper Birch are famous for their peeling bright white bark.
**White Pine**

CLUE
White Pines have needles that are grouped in bundles of five.

**Sugar Maple**

CLUE
Sugar Maples have leaves that look like your open hand.

CLUE
Maple seeds fly like helicopters.

CLUE
Old Maples have bark that breaks into big blocky pieces. Often, the bark has green lichen and moss growing on it.

CLUE
Oak leaves can look like small people with many sets of arms reaching out. What do they look like to you?

CLUE
Acorns are the nuts of an oak tree. Look close and you can see that each acorn wears a "cap."

CLUE
Oak bark has long thick cracks in it.

CLUE
Ash leaves are made up of 5–9 small leaflets.

CLUE
Ash bark looks braided, like cantaloupe skin.
**STRIPED MAPLE**

**CLUE**
This little tree has great big three pointed leaves.

**CLUE**
Look on the bark for the green stripes that give the Striped Maple its name.

**HEMLOCK**

**CLUE**
Hemlock pine cones can be smaller than your thumbnail!

**CLUE**
Hemlock needles are flat, less than an inch long, and have soft rounded edges.
